## Design Thinkiing & Present

臺北市立  
成淵高級中學  
111學年度  
雙聯學制  
雅思學習課程

1

### BRAIN STORMING

Teacher taught us that before we write, brainstorming is a very important step, doing so, various of ideas came out immediately and my mind filled with ideas.

2

### RESEARCH

The second step to do is find a topic, finding informations is a way to decide your topic. most of the people will find researches online because that's the easiest and fastest way. But infor on the internet aren't always real, so it's important to distinguish what's real and fake.

3

### REPORTS & NEWS

News are sometimes more believable. News are edited by professionals or companies, so the reports from them are usually more useful. At this stage, I'll always prepare a lot and then find someone to discuss about it.

4

### DISCUSS

Discuss is very important, everyone has different opinions about an event, I'll find someone like a teacher, my classmates or elders. They always gives me many advises that I didn't think before. Different advises made me consider it all again so that I won't always think in my own position.

5

### UNIFY

Bunches of informations may made you feel dizzy, so "unify" is an important step to do, you may think that it is very simple, but it is more complicated than you think. This step can shape your article and made it more easy to write.

6

### PRESENTING

The last part is to combine everything together. But before presenting, you must make sure that your words are understandable, making it as easy as possible is our goal.
