**Part 4: Short Talk Questions**

*Listen to the following paragraph and answer the questions.*

Zimbabwe is facing a serious wildlife crisis, with the death of dozens of elephants causing concern. These tragic events are largely due to heatwaves and droughts resulting from climate change. Traditionally extending from October to March, the rainy season in Zimbabwe has been progressively delayed, often not beginning until December these days. This delay prevents wildlife from accessing essential resources, leading to increased clashes between animals and humans. Lions, hyenas, and other creatures have wandered into villages in search of food. The nation's elephants have been particularly impacted by the droughts. A 2020 report identified drought as a driving force behind a bacterial infection that killed 35 elephants. Despite efforts to pump water from underground reservoirs, these won't provide enough water to support wildlife survival through the drought, which is expected to continue well into this year. (5 Unit 1) #A

- (D)\* 9. What is true about Zimbabwe's rainy season these days?
- (A) It usually begins after March. (B) It lasts from October to December.  
(C) It always begins before October. (D) It often starts as late as December.
- (A) 10. What did the 2020 report find?
- (A) A drought was responsible for the death of 35 elephants.  
(B) Dozens of elephants left Zimbabwe in search of food.  
(C) A bacterial infection wiped out 35 percent of species in Zimbabwe.  
(D) Some bacteria polluted underground reservoirs in Zimbabwe.
