Part 4: Short Talk Questions (2%)

Listen to the following paragraph and answer the questions.

The four-day workweek is an alternative working model in which employees work fewer days while maintaining the same pay. It aims to improve work-life balance, increase productivity, and reduce stress. In recent years, several countries and companies have tested this system. For example, trials in Iceland showed that workers maintained or even improved productivity and reported higher well-being. Some companies in the United Kingdom and New Zealand have also reported positive results, with employees becoming more focused and efficient during shorter workweeks. However, the model is not always successful. In industries that require continuous operation, such as healthcare and retail, reduced working days can create staffing challenges. Some businesses also find it difficult to maintain output without increasing pressure on employees. As a result, the four-day workweek remains promising but hard to apply across all sectors. (延伸自 5 Unit 13)

- (A) 7. What did trials in Iceland show about the four-day workweek?
- (A) Productivity was maintained or improved.
 - (B) Companies stopped paying full salaries.
 - (C) Productivity decreased significantly.
 - (D) Workers quit their jobs more often.
- (C) 8. Which industry may face challenges with a four-day workweek, according to the passage?
- (A) Technology.
 - (B) Education.
 - (C) Healthcare.
 - (D) Entertainment.
